GIT Repository

Our GIT Repo is here

https://github.com/mdrijwan123/Deployement-of-NLP-Model

To clone open cmd and go to your location where you want to clone your file.

git clone https://github.com/mdrijwan123/Deployement-of-NLP-Model

That's it.

After installing python through anaconda, you can install the required libraries.

Go to the folder where you clone the file and open cmd and type

pip install -r requirements.txt

Note: requirements file should be there to install desired packages there.
